"More lives saved !"

AviCenna® EDIS
Emergency Department Information System

EDIS streamlines and automates the overall Emergency Department (ED) processes in accordance with the users daily clinical and administrative practices; EDIS naturally fits healthcare professionals' workflow. EDIS provides extremely simple and easy-to-use screens in order to enable users enter their data fast and accurate. EDIS monitors each and every step in the ED processes, shows the status of the patients as well as the procedures applied and medicine given. Real-time dashboards enable ED supervisor and on-duty physician and nurse to follow up the activities and status of the department. EDIS is workflow-based and provides extensive QA, BI and KPI facilities to continuously improve departmental activities quality and efficiency.

Furthermore;

- Realistic and deterministic nationwide ER management
- Better utilization of resources
- Continuous improvement in ER delivery
- Patient satisfaction, healthcare professional satisfaction
- Savings from healthcare costs
